yes- haven't had much time to look at the MW01 data since we just got it late last week.

Rick has looked at the MW01 data from USGS and it is again consistent with ours, with, of course, the exception of the glycols due to their much lower detection limit. Lek has asked Dave Jewett and Deb McKean to provide some bullets with overall messages about the Ph5 data, which I presume he will go over today. Attached is the most recent version of the schedule, which I think ORD is expecting you to briefly cover. I want to note that although we have talked with USGS about delaying the release of their report and coordinating its release with our projected Sept 28 date, they've been open to it but we've gotten no clear commitment. So the schedule contains a highlighted action for EPA sr mgmt to call USGS sr mgmt and seek that commitment.

One question. Do we have the USGS data yet?
